$\square \div 12 = 7$     $\square = 144 \div 12$     $108 = \square \cdot 12$     $60 \div 12 = \square$

$5 \cdot 12 = \square$     $\square \cdot 12 = 132$     $36 \div 12 = \square$     $\square = 72 \div 12$

$\square = 12 \cdot 6$     $\square \div 12 = 4$     $\square \times 12 = 12$     $\square = 84 \div 12$

$\square \cdot 12 = 96$     $24 = \square \times 12$     $120 = \square \cdot 12$     $\square \cdot 12 = 48$

**STOP**

If this is the last card  
everything is right!

$\square = 2 \times 12$     $12 \times 8 = \square$     $3 \cdot 12 = \square$
